Driver & Passenger Protection Pod

We are all aware that attacks made against drivers of minibuses, private hire and taxi vehicles are becoming more common by the day.

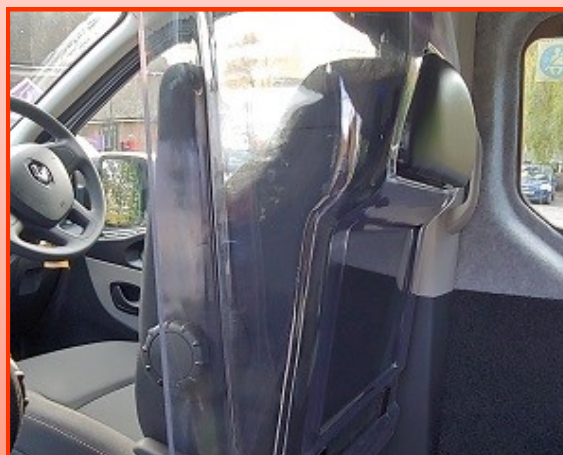

Warnerbus can offer you or your organisation a driver and passenger protection pod which has been designed and rigorously tested to provide the maximum protection in the event of a passenger becoming violent or disruptive.

- * The driver/ passenger safety pod protects both the driver and passenger- preventing physical contact from behind.

- * The protection pod system is particularly flexible; no special tools are needed and it only takes a few minutes to fit.

- * Driver protection pods can be removed and fitted to a different vehicle just as quickly, making them a unique long-term investment in your safety. When you replace your vehicle simply move your pod to your new vehicle, providing dimensions are similar.

If you lease your vehicle, these are perfect for retaining end of lease vehicle values. Simply remove pods to return the vehicle in its original configuration—no drill holes, no making good of pillars / bulkheads required.

Driving Quality™

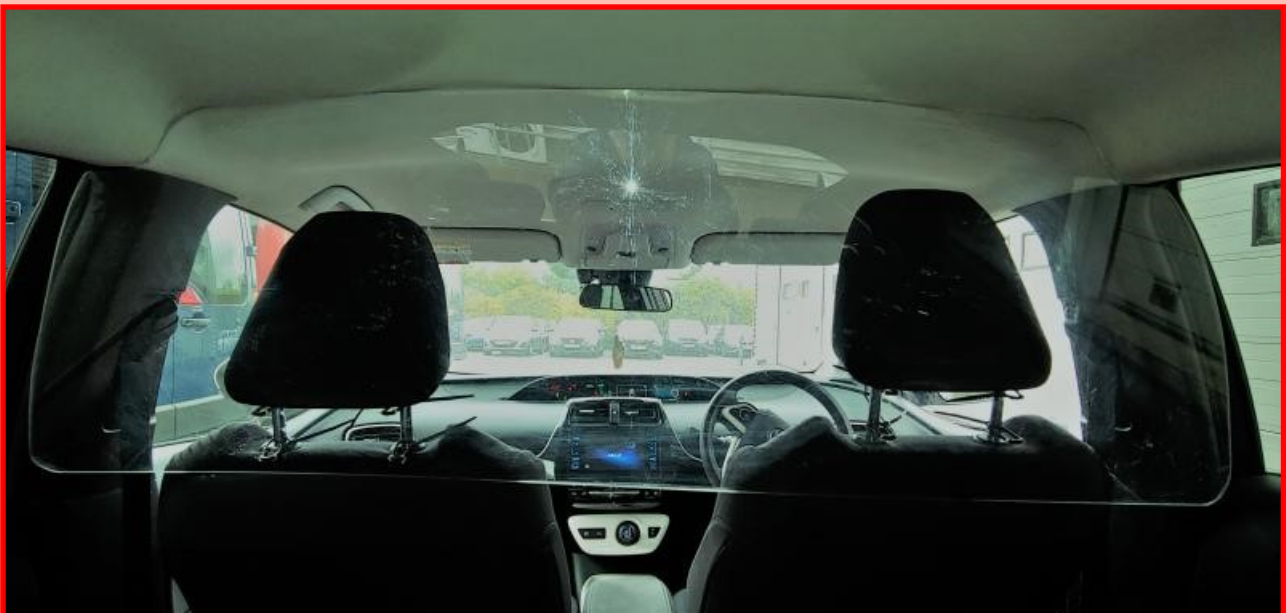

Driver & Passenger Protection Pod

Driver pods are made from tough polycarbonate or PETg plastic providing excellent protection against attack or interference.

- Manufactured in the UK to the highest ISO Standard
- Allows for deployment of curtain airbags
- Has been crash body tested by MIRA (ECE 17)
- Quick-release fittings for easy removal or transfer
- Easily fitted—no screws or bolts
- Seats adjust forwards / backwards in the normal way
- Shields overlay between front seats to prevent access through the middle

We can also fabricate and fit a Perspex shield to your vehicle, which if used with facemasks and sanitiser can help reduce the risk of spreading COVID19.
